```java
public class PrintOddsSol
{
   public static void main(String[] args)
   {
      int[ ] values = {17, 34, 56, 2, 19, 100};

      for (int value : values)
      {
        if (value % 2 == 1)
            System.out.println(value + " is odd");
      }
   }
}
```
